Personal Profile

I am a good-natured second year computer science student studying at Sheffield Hallam University. My goal is to develop as a person and experience new paths in the programming industry. Enthusiasm, determination and technical skills help me fulfil tasks. My abilities include good judgement and being able to work well within teams or individually.

Work Experience

Date: 16/06/2017 – 12/06/2018

McDonalds – Sheffield (Darnall) – S9 5PA

Role: Crew Member

Main responsibilities: Working in a team to provide customer orders at a high rate; making sure that the work area was organised to reduce errors; working in rapid environments with high accuracy.

Date: 30/06/2014 – 04/07/2014

Panasonic Store Sheffield

Role: Sales assistant

Main responsibilities: Providing solutions to customer queries; organising the shop floor; handling the cash register; taking deliveries and assisting customers with purchases.

Education

As a programmer studying computer science I am covering many modules that are teaching me essential skills that will be used throughout my programming journey. In university I am currently studying the following modules:

- Algorithms and Data Structures 2
- Fundamentals of Programming Languages
- Object Oriented Programming
- Databases Languages for Systems
- Software Engineering: Concepts and
- Group Software Development Project

Programming skills:

C++ / C# / Java / HTML / CSS / JavaScript / Android Development

Organisational tools:

GitHub / Trello

Qualification	Grade	Completion date
BSc Computer Science 1 st yr.	2:1(67.5%)	June 2018
A Level ICT	C	June 2017
A Level Mathematics	D	
A Level Physics	E	
GCSE Mathematics	A*	June 2015
GCSE Business Studies	A	June 2014
GCSE Core Science		
GCSE Triple Science	B	June 2015
GCSE Geography		
GCSE English Literature		
GCSE Additional Science		June 2014
GCSE (Short Course) RE		
GCSE Statistics	Merit	June 2013
FCSE French		
GCSE ICT	C	
GCSE English Language		June 2015

Hobbies and interests.

In my spare time I often look into new technological advances thus boosting my passion to create and innovate. This may be looking at the latest uses for artificial intelligence or advances in driverless cars. This encourages me to create my own programs outside of university.

When I am not in university learning, I apply my technical skills on other projects. One of these is creating an Android application with 4 other programmers. This helps me work with other coders with their different styles and techniques of coding.

Recently I participated in HackSheffield 4.0 to work against other teams to create programs and push my drive to succeed. This opportunity allowed me to work in a team within tight schedules. It also allowed team building skills to be applied in a practical situation. Working at a high rate ensures a working program was created within the timescale of the competition.

When I am not coding I play and watch basketball. This builds communication skills and also team building skills. This interest grew at the start of secondary school where I played for the school team and now I play casually with a group of friends
